Care and Quality

# DELIVERING QUALITY WITH DISTINCTION

## 2012 Quality Excellence Achievement Awards

### OVERVIEW

---

The Illinois Hospital Association's (IHA) Institute for Innovations in Care and Quality (The Institute) second annual Quality Excellence Achievement Awards recognizes and celebrates the achievements of Illinois hospitals that are committed to transforming Illinois health care through innovative approaches and best practices.

From 67 submissions representing 40 hospitals, awards were presented to a total of eight hospitals in two categories: urban and rural/critical access. The two award recipients and six finalists, who were honored at IHA's annual Leadership Summit, were selected by a panel of 30 nationally-recognized quality improvement leaders based on their achievement and progress in advancing one or more elements of the Institute of Medicine's six aims for improvement:

- Safety
- Effectiveness
- Timeliness
- Efficiency
- Equity
- Patient-centered care

To share these initiatives among members, The Institute has published this compendium that provides a synopsis of all award entries along with contact information for additional details. The compendium receives national exposure by being featured annually on the Hospitals in Pursuit of Excellence (HPOE), an AHA affiliate, website.

Project Title: *Utilization of an Interdisciplinary Team Approach for the Care of Infants with Hypoplastic Left Heart Syndrome (HLHS)—The Ideal Quality Improvement Collaboration*

Summary: Development of a Norwood Clinic allowed the quality improvement team to create goals to decrease morbidity and mortality and improve the long-term quality of life for patients with HLHS.

Over the past year, the hospital focused on innovative operative and post-operative care, effective care transitions, achieving adequate growth, parent engagement, discharge care coordination, and proactive rehabilitation assessment and intervention.

Length of stay (LOS) decreased from 31.1 to 16.5 days. Readmission rates dropped from 1.21 to 0.79 admissions/patient. Also, there has been a decline in LOS for all congenital heart surgery patients—dropping from 22.9 days (2009) to 6.94 days (2012).
