DELIVERING QUALITY WITH DISTINCTION

2012 Quality Excellence Achievement Awards

OVERVIEW

The Illinois Hospital Association's (IHA) Institute for Innovations in Care and Quality (The Institute) second annual Quality Excellence Achievement Awards recognizes and celebrates the achievements of Illinois hospitals that are committed to transforming Illinois health care through innovative approaches and best practices.

From 67 submissions representing 40 hospitals, awards were presented to a total of eight hospitals in two categories: urban and rural/critical access. The two award recipients and six finalists, who were honored at IHA's annual Leadership Summit, were selected by a panel of 30 nationally-recognized quality improvement leaders based on their achievement and progress in advancing one or more elements of the Institute of Medicine's six aims for improvement:

- Safety
- Effectiveness
- Timeliness
- Efficiency
- Equity
- Patient-centered care

To share these initiatives among members, The Institute has published this compendium that provides a synopsis of all award entries along with contact information for additional details. The compendium receives national exposure by being featured annually on the Hospitals in Pursuit of Excellence (HPOE), an AHA affiliate, website.

Project Title: *Improving Heart Failure Discharge Outcomes—The Project RED Pilot*

Summary: Using FOCUS-PDCA, the hospital identified an opportunity to decrease the 30-day readmission rate for heart failure patients.

In 2010, the rate for all payer patients was 32.4%. Through a partnership with Illinois Hospital Association, the facility implemented Project RED. The goal was to discharge patients with the tools and education necessary to improve health and compliance with treatments, and to keep them functioning in the community.

A Discharge Transition Coach role and an FTE were devoted to the program. Using methods such as intensive daily education with teach-back, an After Hospital Care Plan, and follow-up appointments and phone calls, the pilot population readmission rate dropped to 16.4% and the all facility rate to 23.1%. This led to a full roll out of the program and the development of a Nurse Practitioner led Heart Failure Clinic opening in June 2012.
