Delivering Quality with Distinction

2012 Quality Excellence Achievement Awards Compendium

Recognizing Illinois Hospitals and Health Systems Leading in Quality and Transformative Health Care
The Illinois Hospital Association’s (IHA) Institute for Innovations in Care and Quality (The Institute) second annual Quality Excellence Achievement Awards recognizes and celebrates the achievements of Illinois hospitals that are committed to transforming Illinois health care through innovative approaches and best practices.

From 67 submissions representing 40 hospitals, awards were presented to a total of eight hospitals in two categories: urban and rural/critical access. The two award recipients and six finalists, who were honored at IHA’s annual Leadership Summit, were selected by a panel of 30 nationally-recognized quality improvement leaders based on their achievement and progress in advancing one or more elements of the Institute of Medicine’s six aims for improvement:

- Safety
- Effectiveness
- Timeliness
- Efficiency
- Equity
- Patient-centered care

To share these initiatives among members, The Institute has published this compendium that provides a synopsis of all award entries along with contact information for additional details. The compendium receives national exposure by being featured annually on the Hospitals in Pursuit of Excellence (HPOE), an AHA affiliate, website.
Call for Entries
May 2013

Be sure to watch for this opportunity to be recognized and celebrated for your hospital’s achievements in advancing patient care.
Award Recipients
Award category—Rural/Critical Access

**Katherine Shaw Bethea Hospital, Dixon**

*Streamlining the Intake Process of Cardiac Patients in the Emergency Department*

Award category—Urban

**OSF Healthcare System, Peoria**

*Improving Obstetrical Care Through Organizational Collaboration*

The following pages contain summaries of the award recipients’ projects.
Award Finalists
AWARD FINALISTS

Rural/Critical Access category

**Gibson Area Hospital & Health Services, Gibson City**
Reduce Medication Errors Through the Implementation of Computerized Physician Order Entry (CPOE), Medication Bar Coding and Smart Pump Technology

**Graham Health System, Canton**
Intensive Care Management

**St. Mary’s Hospital, Centralia**
Reducing Readmissions CQI+ Team—Implementing Change Through the IHA Project RED Collaborative

Urban category

**Advocate Hope Children’s Hospital, Oak Lawn**
Utilization of an Interdisciplinary Team Approach for the Care of Infants with Hypoplastic Left Heart Syndrome (HLHS)—The Ideal Quality Improvement Collaboration

**Alexian Brothers Health System, Arlington Heights**
Improvement in Patient Safety and Quality of Inpatient Care Through Appropriate Blood Product Management

**Holy Family Medical Center, Des Plaines**
Collaborative Approach to Reduce Health Care-Acquired Clostridium difficile Infection Rate in a Long-Term Acute Care Hospital (LTACH)

The following pages contain summaries of the award finalists’ projects.
Process Improvement–Clinical

Hospital/System: Saint Anthony’s Health Center, Alton

Project Title: Core Measures—Appropriate Care for Every Patient Every Time

Summary: The goal was to eliminate all variances in the clinical process measures to ensure that patients who present with one or more of the four diagnoses under Core Measures receive 100% appropriate and timely evidence-based care.

A multidisciplinary team immediately reviewed each variance to determine the root cause and take action to prevent reoccurrence. Through real-time case identification and daily house-wide communication; weekly multidisciplinary meetings led by the CEO; ongoing education and constant communication with nursing and physicians; and enhancing their processes through systems thinking, the health center was able to reduce variances in each measure within months.

The goal of 100% appropriate care was maintained through zero variances for nine consecutive months for the heart failure and acute myocardial infarction patient population, and for eight consecutive months for pneumonia patients. The last surgery patient variance was in February 2012.
