MAY 2012

Be sure to watch for this opportunity to **be recognized and celebrated** for your hospital's achievements in advancing patient care.

OVERVIEW

2011 Quality Excellence Achievement Awards Overview

IHA's Quality Care Institute established its first annual Quality Excellence Achievement Awards recognizing Illinois hospital accomplishments for advancing quality patient care in 2011. In May, members were invited to submit their achievements in two distinct award categories: IHA Pledge Quality Achievement Award and IHA Innovation in Quality Award.

The IHA Pledge Quality Achievement Award honors hospitals that have shown significant **improvement efforts meeting the goals of IHA's [Raising the Bar](#)** campaign. The campaign calls for hospitals to engage in specific interventions over the next three years to reduce hospital readmissions and hospital-acquired infections and other complications. Hospitals pledge to work to develop and collaborate on initiatives and programs that will:

- Reduce 30-day hospital readmission rates for congestive heart failure, heart attack and pneumonia; and
- Reduce hospital-acquired conditions and infections such as Methicillin-resistant Staphylococcus aureus (MRSA), C. difficile, central line-associated blood stream infections (CLABSI), catheter-associated urinary tract infections (CAUTI), surgical-site infections, and deep vein thrombosis and pulmonary embolism following certain orthopedic procedures.

The IHA Innovation in Quality Award recognizes hospitals that have demonstrated innovative approaches addressing elements of the Institute for Healthcare Improvement's (IHI) [Triple Aim](#). The IHI Triple Aim program seeks to improve the health of the population; enhance the patient experience of care; and reduce or control the per capita cost of care.

More than 50 quality improvement projects were submitted by 36 hospitals from across the state. Twenty nationally-recognized quality improvement leaders representing a variety of health care organizations, associations and universities comprised a panel that carefully reviewed all entries. Seven winners from six Illinois hospitals and health systems representing urban, rural, Medicaid/safety net, and specialty hospitals were selected and recognized at the IHA Leadership Summit on September 20-21.

Submissions for the second annual Quality Excellence Achievement Awards will be accepted in spring 2012.

IHA INNOVATION IN QUALITY AWARD APPLICANTS

Hospital/System: Resurrection Medical Center (RMC), Chicago

Contact: Katherine Kelly, RN
Coordinator, Cardiology Quality Improvement
773-774-8000 ext. 5333
katherine.kelly@reshealthcare.org

Project Title: *The Code 42 Quality Improvement Project*

RMC had a Percutaneous Coronary Intervention (PCI) within 90 minutes compliance rate 4.8% below the goal of 97.1%. A Code 42 was established through the work of a multidisciplinary team, evidence-based practice and protocols—including a single paging system for the cath team, and data feedback to staff. The resulting compliance rate was 94% with a mean time to primary PCI of 68 minutes.
