Be sure to watch for this opportunity to **be recognized and celebrated** for your hospital's achievements in advancing patient care.

### OVERVIEW

## 2011 Quality Excellence Achievement Awards Overview

IHA's Quality Care Institute established its first annual Quality Excellence Achievement Awards recognizing Illinois hospital accomplishments for advancing quality patient care in 2011. In May, members were invited to submit their achievements in two distinct award categories: IHA Pledge Quality Achievement Award and IHA Innovation in Quality Award.

The IHA Pledge Quality Achievement Award honors hospitals that have shown significant **improvement efforts meeting the goals of IHA's [Raising the Bar](#)** campaign. The campaign calls for hospitals to engage in specific interventions over the next three years to reduce hospital readmissions and hospital-acquired infections and other complications. Hospitals pledge to work to develop and collaborate on initiatives and programs that will:

- Reduce 30-day hospital readmission rates for congestive heart failure, heart attack and pneumonia; and
- Reduce hospital-acquired conditions and infections such as Methicillin-resistant Staphylococcus aureus (MRSA), C. difficile, central line-associated blood stream infections (CLABSI), catheter-associated urinary tract infections (CAUTI), surgical-site infections, and deep vein thrombosis and pulmonary embolism following certain orthopedic procedures.

The IHA Innovation in Quality Award recognizes hospitals that have demonstrated innovative approaches addressing elements of the Institute for Healthcare Improvement's (IHI) [Triple Aim](#). The IHI Triple Aim program seeks to improve the health of the population; enhance the patient experience of care; and reduce or control the per capita cost of care.

More than 50 quality improvement projects were submitted by 36 hospitals from across the state. Twenty nationally-recognized quality improvement leaders representing a variety of health care organizations, associations and universities comprised a panel that carefully reviewed all entries. Seven winners from six Illinois hospitals and health systems representing urban, rural, Medicaid/safety net, and specialty hospitals were selected and recognized at the IHA Leadership Summit on September 20-21.

Submissions for the second annual Quality Excellence Achievement Awards will be accepted in spring 2012.

Project Title: *The SKINcredible Team: Nurse-Driven Approach to Decreasing Hospital-Acquired Pressure Ulcers*

Quarterly surveys revealed elevated hospital-acquired pressure ulcer (HAPU) rates unchanged by previous interventions. A random survey of nurses revealed gaps in awareness and knowledge. Low staff engagement in previous initiatives was identified as a barrier. The unit based Skin Champion Team (SKINcredible) was reorganized into an interactive multidisciplinary group whose members were focused and committed to improve outcomes. Evidence-based nurse driven protocols including risk assessments and a nursing order set were implemented hospital wide. Quarterly National Database of Nursing Quality Indicators data showed a greater than 65% reduction in the occurrence of HAPU.
