

Hospital-Identified Priorities in Community Health Needs Assessments

Tax-exempt hospitals
conduct community health
needs assessments every
three years.

HRET collected CHNAs
from 2,407 hospitals from
across the US.

300

A stratified random
sample of CHNAs was
selected for review.

Review of CHNAs revealed **priority health needs**
and **partnerships** used to address them.

70% of hospitals
prioritize **obesity**

67% of hospitals
prioritize **access
to care**

64% of hospitals
prioritize
behavioral health

44% of hospitals
prioritize
substance abuse

Percentage of hospitals working with community partners

Primary and secondary schools

Community nonprofit organizations

Community health centers and
federally qualified health centers

Public health departments
